Setup

How to Load Paper Roll

- 1. Use thermal paper (2 " x 50').
- 2. Locate the paper compartment on your Dejavoo device.
- 3. Insert thermal paper roll into the open compartment with paper feeding from the bottom.
- 4. Leave a few inches of paper hanging out over the top of the roll.

Note: Some payment terminals may include a separate device for printing receipts. The Dejavoo QD5's receipt printer is built into the terminal.

How to Turn On/Off

- 1. Power On: Press and hold down the power button on the side of your device until your Dejavoo QD5 activates.
- 2. Power Off: Press and hold down the power button on the side of your device until your Dejavoo QD5 powers off.
- 3. If prompted, confirm that you want to turn your Dejavoo QD5 off.

How to Set Up an Ethernet or Wi-Fi Connection

Connect to Ethernet

- Before getting started, ensure your ethernet cable is functional and securely plugged into the open port on your Dejavoo device.
- 2. Access the Core Menu on your Dejavoo QD5.
- 3. When prompted, select the UTILITY option.
- 4. Select COMMUNICATIONS.
- 5. Select LOCAL PARAMS.
- 6. You will then be asked to select a connection option, such as WIFI or ETHERNET. When prompted, select ETHERNET.
- 7. For Mode: select MODE to confirm.
- 8. For Static IP: select STATIC to confirm.
- 9. Use the device's touchscreen to select your desired configuration option, then confirm.

Connect to Wi-Fi

- 1. Access the SETTINGS menu on your Dejavoo device.
- 2. Select either COMM SETUP or WLAN.
- 3. At this point, you will be presented with a series of available connection options: WIFI, ETHERNET, BLUETOOTH, etc. Select WIFI.

Troubleshooting & Tips

How to reboot your Dejavoo QD5

To reboot your Dejavoo QD5:

- 1. Press the power button on the side of the QD5. Hold until a menu appears on your screen. You will then be presented with a series of power options: POWER OFF, REBOOT, etc.
- 2. Select REBOOT.

How to do a Factory Reset

Performing a factory reset on your Dejavoo QD5 will effectively wipe all data from your device, including customized settings and transaction history. However, Dejavoo has stated that they do not recommend users performing a hard reset on their own. The reason for this is that the act of performing a reset on the QD5 completely erases the device's Market application. In the event that instructions are not followed diligently, there is a considerable margin for error here.

One solution involves clearing previous configuration settings and starting fresh with a new TPN. Dejavoo users who plan on clearing the Aura application from a prior configuration will want to clear their Data from the Android settings.

Below are the steps required to delete CreditApp and/or PinpadApp:

- 1. Select SETTINGS once in the Android home screen.
- 2. Select ABOUT POS.
- 3. Select POS CONFIGURATION.
- 4. When prompted, select your Administrator Login. Your password for this login will either be 01062009 or 99999999. Following this, be sure to double-confirm your login.
- 5. Select the back arrow twice, then navigate to APPS.
- 6. Select DVPAY.
- 7. Select STORAGE.
- 8. When prompted, select the CLEAR DATA option.
- 9. Return to the home screen.
- 10. Merchants are encouraged to back up sensitive data before resetting their Dejavoo device.
